Friday 4pm @ The Hive
Build Session at 5pm
FREE FOOD
buildspace.cc/discord

Buildspace is a 7C community where people of all backgrounds who love technology for its

own sake come to create, share, learn, and have fun together. If that sounds like you, show up to Buildspace at the Hive this Friday (and every Friday) at 4-6pm!

You may be wondering, “What should I expect when I show up at the Hive this Friday at 4-6 pm?” Well, we talk about our interests and host casual presentations to hear about all the cool stuff people are working on and learning about.

If you have such a passion project or area of interest, we want to hear about it, so show up to Buildspace! If you’ve never made your own project or shared your work with others before, you are the very reason we created Buildspace, and we would love to see you here. If you just want to see what’s going on, you should come to Buildspace!

The 7C’s are filled with passionate people who love to talk and learn about technology/computing-adjacent subjects, and our mission is to connect them all! See you this Friday (at 4-6 pm in the Hive)!

Best,

The Buildspace Team
