Hi CMC'ers!

The faculty of the Kravis Department of Integrated Sciences invite you to a special session on **Friday, September 5, at 10 AM** to learn about research opportunities in our department. This session is open to *all students* - first-year students to seniors - and *all majors*. The session will be held in RDSC (Robert Day Sciences Center) 134.

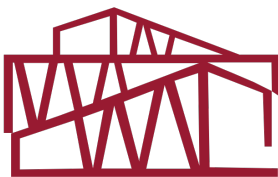

From 10-11 AM, we'll have lightning talks by the KDIS faculty about their research as well as opportunities to join their labs. Immediately afterwards, we'll have a social get-together where you can chat with professors to learn more about their research.

Shortly after that session, we'll post a resource with a listing of these research opportunities and a form that you can use to indicate the labs that interest you most.

If you plan to attend the event on the 5th - or can't attend but want to receive information about research opportunities and other future events - please [_complete this form by September 3 at 5 PM.](#)

Thanks, and we hope to see you on September 5.

Prof. Ran "RON" on behalf of the KDIS faculty
