Claremont Accelerator Invites You to Cohort IV Demo Day

We are thrilled to invite you to the [Demo Day https://luma.com/sq7hic1o](https://luma.com/sq7hic1o) for Cohort IV of our student-led accelerator! Join us on **April 24 at CMC's Freeberg Forum** to meet some of the most promising student entrepreneurs and explore ventures across AI, fintech, biotech, and enterprise software.

Event Details:

- 4:00–5:00 p.m.: Startup Pitches
- 5:00–5:30 p.m.: Networking Session (snacks and drinks provided)
- Location: Freeberg Forum (Kravis Center LC-62) at Claremont McKenna College

Featured Startups (Cohort IV):

- **Vorpal:** AI infrastructure for private capital that ingests unstructured data into firm-specific investment frameworks, eliminating manual analyst workflows and augmenting investment decision-making. Already partnered with institutional wealth managers (\$100B+ AUM) and building toward early enterprise deployments.
- **Kandor** (formerly Naficy): A next-generation enterprise intelligence platform for understanding human behavior at scale. Kandor replaces surveys, expert calls, and static feedback tools with AI-powered adaptive interviews that generate real-time insights across customer sentiment, employee experience, and commercial due diligence, and it delivers a fundamentally richer layer of intelligence for funds and enterprises. Currently piloting with a Series C growth fund.
- **Lintel:** AI-powered document intelligence for construction that surfaces regulatory conflicts, contractual gaps, and design inconsistencies before they reach the job site—preventing costly delays and overruns. Multiple pilots are currently underway with industry partners ahead of broader deployment.
- **Flash Biometrics:** A category-defining facial recognition platform with over 1M users and multi-million dollar revenue, capable of identifying multiple faces simultaneously across massive datasets with industry-leading speed and precision.

This is a unique opportunity to experience the entrepreneurial energy of the Claremont ecosystem, support student founders, and connect with builders, investors, and operators. We look forward to an inspiring evening of innovation, creativity, and meaningful connections.
